

CLAIM AMENDMENTS

1. (Currently Amended) For use with a spray bottle having a manually operated, elongated trigger-type grip, a cover for the grip, comprising:

a sleeve of pliable material having an open end, a closed end, an internal length, [[and]] an internal cross-sectional dimension and a wall thickness; and wherein:

the length is on the order 2.5 cm or less; [[and]]

the internal cross-sectional dimension is on the order of 1 cm or less; and

the wall thickness, including the closed end, is substantially consistent.

2. (Original) The cover of claim 1, wherein the internal cross section is circular.

3. (Original) The cover of claim 1, wherein the internal cross section is rectangular.

4. (Original) The cover of claim 1, wherein the sleeve of pliable material is composed of a coextensive liner and overlay.

5. (Original) The cover of claim 1, wherein the sleeve of pliable material has a durometer on the order of 25-100 SHORE A.

6. (Original) The cover of claim 1, wherein the sleeve of pliable material has a durometer on the order of 50 SHORE A.

7. (Original) The cover of claim 1, wherein:

the length measures from 1.35 to 1.4 cm; and

the internal cross section is circular with a diameter measuring 0.4 to 0.5 cm.

8. (Original) The cover of claim 1, wherein:

the length measures from 2.0 to 2.5 cm; and

the internal cross section is circular with a diameter measuring 0.35 to 0.4 cm.

9. (Original) The cover of claim 8, wherein the sleeve of pliable material is composed of a coextensive liner and overlay.

10. (Original) The cover of claim 9, wherein the sleeve has a combined wall thickness of 0.1 cm, or thereabouts.

11. (Original) The cover of claim 1, wherein:

the length measures approximately 2.0 cm; and

the internal cross section is circular with a diameter measures approximately 0.5 cm.

12. (Original) The cover of claim 11, wherein the sleeve of pliable material is composed of a coextensive liner and overlay.

13. (Original) The cover of claim 12, wherein the sleeve has a combined wall thickness of 0.1 cm, or thereabouts.

14. (Original) The cover of claim 1, wherein:

the length measures approximately 1.5 cm; and

the internal cross section is rectangular having internal cross-sectional dimensions of 0.1 by 0.5 cm, more or less.

15. (Original) The cover of claim 1, wherein:

the length measures approximately 1.25 cm; and

the internal cross section is rectangular having internal cross-sectional dimensions of 0.25 by 0.625 cm, more or less.
